

MANAGEMENT DISCUSSION AND ANALYSIS

SECOND QUARTER INTERIM REPORT

FOR THE PERIOD ENDED JUNE 30th 2009

The following Management Discussion and Analysis (MD&A) is a supplement to the unaudited financial statements for the period ended June 30th 2009 which is deposited under Ditem Explorations, Public Documents at www.sedar.com. The present MD&A should be read in conjunction with the 2008 audited Annual Financial Statements and the corresponding MD&A as well as the last Quarterly Report for the period ending March 31st 2009.

This MD&A represents views and comments of management on the Company's current activities and contains a brief outlook of activities and objectives for the coming months.

1. DATE

This MD&A for the period ended June 30th 2009 was completed on August 25th 2009. As required, important activities and events after June 30th 2009 are also noted.

2. CORPORATE PROFILE

Ditem is a uranium exploration and development company, incorporated in May 1993 under the *Canada Business Corporations Act* and listed on the TSX Venture Exchange (DIT, TSX-Vx). The Company has been publicly listed since August 24th 1995. Ditem also trades on the Frankfurt Stock Exchange under the symbol D8X since January 2007.

The Company's principal properties are situated in the Otish Mountains region of north-central Quebec (principally in the Otish Basin) and in the Lake Athabasca Basin in Saskatchewan. Other properties and exploration projects in Quebec and in Canada are currently being reviewed as part of on-going activities.

The Company had no income or royalties from production or from production related activities in Q2 2009 and none are anticipated in 2009. All properties and interests are at the exploration stage.

3. EXPLORATION ACTIVITIES

A summation of Ditem Exploration's projects and properties with a brief prospectus of on-going activities and exploration programs is presented in the following table. A more detailed text review follows. All programs are subject to review and modification by the Board of Directors until final approval. New programs may be undertaken at the Board's discretion.

PROPERTIES	INTEREST HELD	EXPLORATION PROGRAM	PROPOSED PROGRAMS
Quebec Properties			
Otish Uranium	486 claims totaling approximately 258km ² 100% Ditem owned.	Detailed regional uranium review of entire Otish Basin completed, 43-101 completed; airborne magnetics, radiometrics and TEM surveys completed and reviewed, 6 hole drill program completed in 2007, follow up 4 hole drill program completed in 2008 on identified targets.	Results of the previous drill program released in 2009; additional exploration and drilling scheduled for winter 2009 on selected identified targets.
Tichegami	48 claim cells, 205.3 km ² , 90% Ditem.	5 kimberlites (uneconomical) identified in 2003.	No work planned for the present year.
Matoush	2% NSR.	Strateco drilling program ongoing in 2009.	
Hemingford	4 claim cells, 100% Ditem.	No work planned for the present year.	Properties will be maintained and may be subject to option.
Saskatchewan Properties			
Beartooth Island	4 mineral dispositions totaling 237.6 km ² ; Ditem interest is at 60%; Ditem is operator.	Airborne MegaTem survey completed, Magneto-Telluric survey completed and targets identified. Additional Magneto-telluric survey on northeastern sector and a 3 hole drill program completed in 2008.	43-101 completed; ground geophysics completed, drilling program completed in 2008, final results released in 2009, proposed program for early 2010.
Cree Lake	100% interest (2% NSR to a third party) on mineral dispositions (8 claims in total) totaling 28, 363 ha.	Airborne VTem and Mag surveys completed; ground and structural study completed, target drilling proposed.	Completed the re-staking of 6 highly potential claims (for a total of 8), proposed radon survey planned and subject to a specific financing drilling on identified targets.

A description of the properties, maps and exploration programs is available on the Company's Web site at: www.ditem.com.

The Otish Mountains Properties, Quebec

A. Otish Uranium property

Located at the uranium rich western edge of the Otish Basin, the property consists of 486 contiguous claims totalling 258 km² including Ditem's Beaver Lake properties. The Otish Uranium property is bordered to the south by the Cameco Otish block and extends northward to the 52° parallel with the Matoush property a few kilometers to the East. The property encompasses the UEM block on which is reported uranium leached surface assays grading from 0.23% up to 2.46% of U₃O₈. In 2006, Ditem mandated InnovExplo to compile relevant existing data on the entire Otish Basin. This regional compilation was completed in 2007.

From data collected in the 2007 detailed magnetometer, radiometric and TEM airborne surveys (at 150 m line spacing) and in cooperation with previously available structure and drill reports from historical work, targeted areas were selected for detailed exploration and drilling. Drilling began in mid-June and 6 holes

have been drilled to target unconformity deposits. Drilling was completed in late November 2007. However, results of the program have produced weak uranium indications.

In January 2008, Geophysique Camille St-Hilaire undertook a new analysis and interpretation of the 2007 survey incorporating data obtained from the 2007 drill program. As a result of this and other elements, a revised drill program has been prepared. In August 2008, and following the completion of a specific financing, the Company has undertaken a 4 hole drill program to test targets identified as a result of last year's drilling in combination with recent analysis.

One drill hole encountered trace amounts of uranium related to a 10 cm altered gabbro dyke intersection using a RS125 Spectrometer. It is not known whether the gabbro dyke is the cause of that conductive anomaly as pyrite mineralization was encountered elsewhere in the drill hole. The core recovered from the three other drill holes completed into the two other conductive anomalies did not produce evidence of uranium. Yet, these drill holes did encounter significant sulphide mineralization (pyrite and pyrrhotite) which can likely explain the cause of the two anomalies.

Each drill hole was left cased and open for future down hole geophysical surveys to confirm the cause of the three conductors.

As a result of a completed flow-through financing, the Company is currently planning a comprehensive winter program for late 2009 and early 2010.

B. The Matoush NSR

The Company maintains a 2% NSR on the Matoush property, being explored and developed by Strateco Resources.

The Lake Athabasca Properties, Saskatchewan

C. The Beartooth Island property

Located approximately 72 kilometers southwest of Uranium City, Saskatchewan, and approximately 10 kilometers southeast of the Maurice Bay uranium deposit (Cameco) the Beartooth Island property is geologically well situated. This prospect is composed of four mineral dispositions totaling 23,760 hectares (58,712 acres) located along the north-west perimeter of the Athabasca Basin.

For the first phase of the exploration program in 2006, a \$200,000 Megatem II survey was completed. The Megatem II survey consisted of 1,156 line km and covered the entire property, including the island and surrounding portions of Lake Athabasca. The property-scale, high-resolution and deep-penetrating electromagnetic-magnetic survey conducted at the Beartooth Island property has been completed and preliminary reports received. The M II system appears to have outlined several north-south-trending lineaments in the western portion of the property and northeast-trending lineaments in the eastern part of the property all thought to potentially represent fault zones.

By mid year 2007, a successful ground Magneto-Telluric survey was completed, final data was received and subsequent targets were defined. Throughout early 2008, a Spartan MT survey compiling 18 lines, for a total of 118.2 line kilometers over one additional priority target area (coverage over the northeast section of property) was run. As well, a detailed in-fill was also completed which surveyed over selected areas of the remainder of the property and based on the definition of a series of anomalies.

In 2008, the drilling program totaled 2511.55 meters, successfully testing three separate conductors as defined by the winter 2007 Spartan MT survey. Variable hydrothermal alteration (hematite, chlorite, limonite and clay) normally associated with uranium deposits in the area were intersected to the

unconformity and into the basement rocks. Both of these holes also showed an increase in radioactivity above background and elevated boron values. A follow-up down-hole time domain electromagnetic survey (BHTEM) identified two off-hole conductors in two of the three holes completed. These first drill intersections on the Beartooth Island property are highly encouraging in light of the evidence of hydrothermal alteration, elevated boron values and off-hole electromagnetic conductors. This may indicate a neighboring mineralized structure. Both targets coincide with the ground magnetotelluric geophysical anomalies. Ditem's geologist Alan Davies was present on the Beartooth Island property for the drilling and MT program.

Final assay results from the diamond drill program included: 1) anomalous uranium values above background levels; 2) evidence of hydrothermal alteration; 3) elevated boron values and 4) off-hole electromagnetic (BHTEM) conductors. The off-hole BHTEM conductors proximate to the unconformity contact represent high priority drill targets, along with remaining untested geophysical features within the property. The operator of the drill program, Golden Valley Mines, is to make the results known on completion of a review program.

Effective September 2008, Ditem became operator with a 60% interest on the completion of a \$3.5M exploration program on the property.

At the recommendation of the technical team, the Company is currently planning a follow up drill program for the 2010 season.

D. The Cree Lake property

The Cree lake property is located in the southwest sector of the Athabasca Basin in northern Saskatchewan. The property was acquired by Ditem in April 2006 and is subject to a 2% NSR. The property was partially (2 claims) renewed in 2009, with an additional 6 claims that were re-staked in summer 2009. The current acreage of the 8 claims (100% Ditem owned) on the Cree Lake property is 28,363 ha.

In March 2007, V-Tem and magnetic surveys were flown over the entire property of Cree Lake at 200 meter line spacing with areas of interest flown at 100 meter line spacing. Further interpretation was completed by JVX and 4 prominent conductors were identified, offsets in two of these conductors occur at magnetic breaks. From this detailed interpretation, Ditem was able to identify the highly potential zones on the property.

Subject to an upcoming financing, the Company is planning an extensive program for the winter 2009 season with a clear focus on comprehensive geophysics, including a radon survey over the area. This program will be necessary in order to better define potential target anomalies. A drill program will be undertaken if warranted.

4. SELECTED ANNUAL INFORMATION

What follows is selected Quarterly Information for the quarter ending June 30th 2009 to be discussed in the present MD&A.

Selected Quarterly Information

	Results as of June 30th 2009	Results as of December 31st 2008	Results as of June 30th 2008
Shareholder Equity	\$9,057,451	\$8,863,588	\$10,791,895
Accumulated Deficit	\$10,601,968	\$10,284,472	\$6,846,222
General Expenses	\$169,573	\$939,069	\$256,188
Current Assets	\$943,471	\$965,494	\$1,390,565
Deferred Expenditures	\$7,936,125	\$7,791,190	\$7,871,267

5. LIQUIDITY AND CAPITAL RESOURCES

Assets as of June 30th 2009 totaled \$9,524,758. The Company had current assets, including accounts receivable and prepaid expenses of approximately \$943,471 as compared to \$660,927 on March 31st 2009. This increase results from a flow-through financing made on June 12th, 2009. Marketable securities at fair value as of June 2009 are evaluated at \$194,349 as compared to \$190,890 for the First Quarter.

Accounts receivable of \$86,186 are composed of sales tax returns for an amount of approximately \$25,745 for federal and provincial sale taxes which have since been received, various companies and suppliers for a total of \$25,441 to be received and Quebec resource tax credit of \$35,000 which is also to be received.

Accounts payable at June 30th 2009 total \$98,307 and are composed of amounts related to on-going expenses for \$8,500 and regular suppliers for \$89,807. Those amounts owing have since been paid.

Shareholder equity at \$9,057,451 for Q2 2009 is slightly increased as compared to \$8,751,861 as it was at for Q1, and is the result of the June 2009 financing.

6. OPERATIONS AND DEFICIT

In Q2 2009, revenues in the form of interest payments on bank deposits totaled \$1,187 as compared with \$6,509 for Q2 2008. Furthermore, on June 1, 2009, Ditem sold 24,000 common shares of Cadiscor for an amount of \$20,517 and 25,202 common shares of Cadiscor were exchanged for 8,316 common shares of North American Palladium, under a Cadiscor reorganisation.

Operating expenses were in keeping with the Company's activities. As a result, general expenses decreased slightly from \$256,188 in Q2 2008 to \$169,573 in Q2 2009 mostly in relation to the decrease in travel and professional fees. The Company continues to reduce operating expenses as a result of cost reduction objectives and activity in 2009. Consequently, net loss for this First Quarter was \$144,410 as compared to \$197,924 in the Second Quarter of 2008. The accumulated deficit increased to \$10,601,968.

Revenues and Net Loss and Net Loss per Share by Quarter

Quarter	Revenues	Net Profit	Net Loss per Share	
		(Net Loss)	Issued	Diluted
30/06/2009	\$1,187	(\$144,410)	\$0.003	\$0.003
31/03/2009	\$1,534	(\$202,072)	\$0.004	\$0.004
31/12/2008	(\$693,572)	(\$2,909,660)	\$0.080	\$0.080
30/09/2008	\$4,532	(\$614,548)	\$0.014	\$0.014
30/06/2008	\$454,112	\$197,924	\$0.013	\$0.013
31/03/2008	\$24,101	(\$274,062)	\$0.006	\$0.006
31/12/2007	\$129,417	(\$679,110)	\$0.030	\$0.030
30/09/2007	\$41,385	(\$73,481)	\$0.012	\$0.012

7. FINANCING

In June 2009, the Company completed a non-brokered private placement of 4,166,667 flow-through units at a price of \$0.12 per unit for gross proceeds of \$500,000. Each unit consists of one flow-through common share of Ditem and one half of one share purchase warrant, with each whole warrant entitling the holder to purchase one common share of Ditem at a price of \$0.20 per share for a period of twelve months from the date of closing.

A summary of financings from January 1st 2006 to June 30th 2009 is given below.

Shares					Warrants	
Date of Financing	Number of Shares	Cost	Amount Before Expenses	Non Flow-Through	Number	Cost
Apr. 2006	5,777,776	\$0.1125	\$649,999.80	\$320,812.43	5,777,776	\$0.15
Nov. 2006	7,000,000	\$0.25	\$1,750,000.00	\$875,000.00	1,750,000	\$0.35
Dec. 2006	2,666,666	\$0.45	\$1,199,999.70	\$1,199,999.70	1,333,333	\$0.60
Jan. 2007	4,231,000	\$0.65	\$2,750,150.00	\$2,750,150	2,115,500	\$0.75
Oct. 2007	2,500,000	\$0.80	\$2,000,000.00	0	0	0
Jul. 2008	1,500,000	\$0.50	\$750,000	0	0	0
Jun. 2009	4,166,667	\$0.12	\$500,000	0	2,083,333	\$0.20
Total of Financings			\$9,600,150.50			

8. FINANCIAL COMMITMENTS

Financial commitments of the Company are related only to on-going exploration expenditures and normal operating expenses. The Company has no long term obligations.

Obligations related to an option agreement with Golden Valley Mines for the Beartooth Island property have been met and Ditem has acquired a 60% interest in the property. The additional 6% is conditional to a bankable feasibility study which the Company may or may not undertake.

There are no other financial commitments of any kind other than those from normal and on-going exploration programs, which Ditem may or may not continue, depending on financial resources, new exploration programs and development opportunities.

9. EXPLORATION EXPENSES AND USE OF PROCEEDS

Total exploration expenses on Ditem properties for Q2 2009 were \$69,035 as compared to \$110,900 in Q1 2009. Exploration expenses included compilation and review work on the Beartooth Island and are presented below on a property basis, by type of activity.

Ditem Exploration Expenditures (Q1 2009)

Properties	OTISH URANIUM	BEARTOOTH ISLAND	CREE LAKE	TOTAL
Drilling Program	-	-	-	-
Geological and Geophysical Survey	-	-	-	-
Geological Work	-	\$69,035	-	\$69,035
Others	-	-	-	-
TOTAL	-	\$69,035	-	\$69,035

Deferred expenditures increased from \$7,880,090 at the end of Q1 2009 to \$7,936,125 as of June 30th 2009 and include Quebec resource tax credits of \$13,000.

New CEE flow-through funds have been raised for admissible exploration work on Ditem properties. Consequently the Company is setting up a program for fall 2009.

Non Flow-Through and Flow-Through Financings in 2007, 2008 and 2009

	Non Flow-Through	Flow-Through		Total
		CEE	CEE (Qc)	
January 2007 All shares at \$0.65 and half warrant at \$0.75 for non flow-through	\$2,750,150	\$0	\$0	\$2,750,150
October 2007 All shares at \$0.80	\$0	\$2,000,000	\$0	\$2,000,000
			Total	\$4,750,150
July 2008 All shares at \$0.50	\$0	\$0	\$750,000	\$750,000
June 2009 All shares at \$0.12	\$0	\$0	\$500,000	\$500,000
			Total	\$6,000,150

Flow-Through Exploration Reserve (from December 31st 2007 to June 30th 2009)

	CEE	CEE (Qc)	Total
Flow-through Reserve December 31st 2007	\$2,000,000	\$0	\$2,000,000
Flow-through Exploration Expenses to March 31st 2008	(\$823,564)	\$0	(\$823,564)
Flow-Through Exploration Expenses to June 30th 2008	(\$1,176,436)	\$0	(\$1,176,436)
		Total	\$0
Flow-through Reserve on July 28th 2008	\$0	\$750,000	\$750,000
Flow-through Exploration Expenses to December 31st 2008	\$0	(\$750,000)	(\$750,000)
		Total	\$0
Flow-through Reserve on June 30th 2009	\$0	\$500,000	\$500,000
		Total	\$500,000

10. RELATED PARTY TRANSACTIONS

In consideration of Management, Company administration and direction, the CEO received a monthly fee of \$5,000 as approved by the Board of Directors.

The Company has its offices at 1155 University St., suite 1215 in Montreal and pays its share of the cost of the lease, taxes, office insurance, telephone and fax leasing contract and other related and similar costs to 3915671 Canada Inc. The sole shareholder of the latter is Raymond Savoie, a Ditem Director. 3915671 Canada Inc. does not charge fees of any kind for this service nor does it produce any profit on operations, the Company having been created solely to facilitate office administration and to reduce costs for office maintenance.

11. CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of estimates relate to assessing the realizable values of mining and exploration assets. Consequently, actual results could differ from those estimates.

Properties include rights in properties and deferred exploration expenses. Exploration expenses are deferred until the economic viability of the project has been established, at which time the expenses are added to properties. Expenses are written off when properties are legally abandoned, or when expense recovery is uncertain. Management has defined uncertainty as either there being no financial resources available for development over a period of three consecutive years or results from exploration work not warranting further investment.

12. CHANGES IN ACCOUNTING POLICIES

Convergence with International Financial Reporting Standards (IFRS)

In January 2006, the Canadian Accounting Standards Board (AcSB) announced its decision to replace Canadian GAAP with IFRS. On February 13, 2008, the AcSB confirmed January 1, 2011, as the mandatory changeover date to IFRS for all Canadian publicly accountable enterprises. This means that Ditem will be required to prepare IFRS financial statements for the interim periods and fiscal year ends beginning in 2011. The Company is creating an implementation team, which will consist of internal resources and external consultants. A changeover plan is being established to convert to the new standards within the allotted timeline and is expected to consist of the following three key project phases:

1. Raise Awareness and Assess Phase
2. Design Phase
3. Implementation Phase

Phase 1: Raise Awareness and Assess

The first phase of conversion project has two stages, focusing firstly on raising awareness within the Entity and providing an initial assessment of the impact of the IFRS conversion, and secondly on carrying out a detailed assessment of the impact of the conversion to IFRS. Each section will be thoroughly reviewed and analyzed for accounting or disclosure differences between Canadian GAAP and IFRS. Once differences have been identified they will be reviewed for potential impacts to existing accounting policies, information systems and business process. An action plan will then be developed for each impact area. This phase is currently underway.

Phase 2: Design

Following completion of the assessment phase, the focus of the design phase will build the tools required for the conversion based on management's decisions about accounting options and the related disclosures. During this phase, external consultants will assist the project team in designing the changes to the implemented tools relating to accounting and consolidation processes, information technology systems and other affected business aspects, including but not limited to, changes to contracts, key performance indicators, internal reporting.

The design phase will also involve revisiting the communication and training strategies to be carried out during the implementation of IFRS and updating the operational and milestone plans, and an issues log for finalization of actions to be taken during the implementation phase.

Phase 3: Implementation

The implementation stage is about execution. The roll-out of the designed changes takes place during this phase.

This phase will accomplish:

- Developing the new accounting policies, accounting manuals, guidelines, processes for reporting packages from business units, and consolidation templates;
- Preparing the IFRS financial statements and related disclosures including facilitating and supporting the dry run financial reporting process;

All phases are expected to be completed by December 2009 in order to facilitate comparative reporting for the first quarter of 2010.

13. CERTIFICATION OF INTERIM FILINGS

For the financial period ending June 30th 2009, the Chief Executive Officer and the Chief Financial Officer in collaboration with the Audit Committee of the Company reviewed the interim financial statements and interim MD&A (together, the “interim filings”) of the Company.

The Chief Executive Officer and the Chief Financial Officer of the Company represent that, based on their knowledge and having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the financial period covered by the interim filings and fairly present in all material respects the financial condition, results of operations and cash flows of the issuer, as of the date of and for the periods presented in the interim filings.

The Chief Executive Officer and the President are responsible for ensuring and confirming that processes are in place to provide them with sufficient knowledge to support the above mentioned representations.

14. OTHER

Public company information is available on SEDAR at www.sedar.com or at the Company’s web site at: www.ditem.com.

All expenses related to properties and exploration programs were financed by Ditem and paid with Ditem funds.

15. RISKS AND UNCERTAINTIES

Exploration and development in the mining sector involve significant financial risks. The success of the Company will be influenced by a number of factors including financing, exploration risks, and environmental and other regulations. The Company will periodically have to raise additional funds to continue operations, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

16. SHARES, WARRANTS AND OPTIONS

As of June 30th 2009, the Company has 50,939,751 shares in circulation, as compared to 46,773,085 on March 31st 2009. Fully diluted the Company has 57,347,582 shares issued and outstanding.

Total Shares Issued

17. OUTLOOK

Uranium continues to maintain a relatively strong market price and, understandably, key investor interest. This should be maintained over the coming months and even strengthened as demand should increase given recent developments for energy sources. There is a probability, according to some, that we may see a modest rise in prices later this fall. The Athabasca and, to a lesser extent, the Otish Basin continue to be centers of exploration activity and results from both these areas are certainly encouraging.

During Q2, Ditem completed a flow-through financing for its Quebec exploration program on the Otish Uranium property, completed property reviews, began initial work for the Cree Lake project and reviewed new projects. During the remainder of 2009, we intend to undertake an aggressive exploration program on the Otish Uranium property and proceed with our exploration program on Cree Lake.

As Ditem continues its exploration programs in both of these Basins, we are quite confident that, in spite of our decreased market value over the past three months, the situation will be corrected this fall as programs are announced and we move ahead with our exploration work.

At the shareholder meeting held in late June, Dr. Lo-Sun Jen was elected to the Ditem Board of Directors. Dr. Lo-Sun Jen received a B.Sc. in 1962, a M.Sc from Queen's University in 1967, and a Ph.D. from the University of Ottawa in 1975 in geology. Later he pursued additional training in economics and mineral economics at the University of Ottawa, Carleton University and McGill University, respectively. Mr. Jen joined the Federal Department of Energy, Mines and Resources in 1974, first as a resource evaluation analyst, then as a mineral economist and senior mineral economist. From 2005 until his retirement in 2007, he worked in the capacity of Executive Advisor on Mining, Development and Investment and as a Departmental Advisor on Asia in the Economic, Investment and Fiscal Analysis Branch, Minerals and Metals Sector at Natural Resources Canada (NRCan). Currently he is President of Jen Minerals Consulting in Ottawa. Dr. Jen has been active as a Ditem consultant since 2006 and knows the Company and its projects well. His knowledge of exploration and mining activities throughout Canada will certainly be a plus.

The Directors of Ditem wish to thank shareholders for their continued support.

August 25th 2009
